PART 1. INTERCONNECTION LINK SERVICES

1.1 Non-Recurring Charges

Non-recurring Charges apply to any non-existing: (i) additional Interconnection Link E1 circuits that the Parties may require or agree to establish between their respective Systems or; (ii) new Interconnection Link E1 circuits that the Parties may require or agree to establish between their respective Systems. These non-recurring Charges and the necessary technical parameters shall be established between the Parties and at the prices for such circuits to be determined by agreement between the Parties on an individual case basis. The Parties agree to use their respective reasonable endeavours to negotiate agreement as to all such associated costs (and each component thereof), giving consideration to the following:

- If a Party requests the establishment of a new Point of Connection for an Interconnection Link, the requesting Party shall be responsible for paying all costs associated with the new Point of Connection for the Interconnection Link, including, inter alia, a one-off (non-recurring) Charge, and all the reasonable costs associated with the initial construction of the new Point of Connection for an Interconnection Link;
- Non-recurring Charges for a new an Interconnection Link shall include installation, testing and, where ordered, reconfiguration. These Charges will be payable by the Party requesting the new Interconnection Link. The Charges for such Service will also cover the labour, material, and other costs, plus a (15%) markup; and
- Future reasonable non-recurring Charges for capacity expansion, installation, testing and reconfiguration shall be shared between the Parties based on who the requesting Party is and the nature of the Interconnection Link being requested, and shall be based on an agreement, in writing, between the Parties.

For the avoidance of doubt, any Interconnection Links existing between the Parties on the Effective Date will not incur a non-recurring Charge for any immediate and necessary reconfiguration or reduction of capacity resulting from this Agreement during the Segregation Transition Period. Thereafter, to the extent that Telco requests a new E1 circuit on an existing Interconnection Link provided by GTT, up to the original capacity of the Facilities currently in place on that Interconnection Link, GTT will assess an activation charge of GYD 31,500* per E1.

1.2 Monthly Recurring Charges

Monthly recurring Charges associated with the Facilities for the entire span of each Interconnection Link are as follows:

Uni-directional E1 Charge Monthly Recurring Charge GYD VAT Exclusive	
Line Charge	Port Charge
58,500.00*	4,500.00*
